What's new:

For details on all of the stories, classifications, class combinations, and skill paths, consult the "Class Description" portion of your Inner Card. Remember that creating a class combination will eliminate all of your current traits; therefore, creating a class combination with the traits you desire will be more difficult than other combinations. However, your level rank will increase as you gain experience. For example, as a level 30 character, you are more easily able to create a level 30, 30, 1 combination.

The following information is what is required to keep your Noble's Attribute as a Orichalc:

- **Inner card 1 (Ego Trap) – Soul Memory**
- **Inner card 2 (Evasion Adept) – Agrin's Wisdom**

Soul Memory and Agrin's Wisdom can be obtained by visiting the "How to Get Additional Inner Cards" section on the main page. In addition, Soul Memory can be obtained by killing Galressin, one of the seven Orichalcum Collectors. For more information on the Orichalcum Collectors, refer to the "Character Class Description" in the Appendix.

Chapter 2: Hero of Serendia

In this new world, you make a living by becoming a hero of Serendia, turning the continent into a world that only heroes like you can live in—a world where your actions are finally and truly worthy of being called heroic.

But the journey ahead of you is not a smooth one. The Dragon of Darkness, the most disturbing of all maggots, lingers in this terrible and perilous world. And as you set forth to take on the hordes of the forces of darkness that rule your world, the anxiety of finding your way through the maze of dangers will make every moment count.

"Set the course that you have to pursue." Although your tasks are simple, just as the name implies, you
