## What's New in the Lumion?

Lumion is a multi-platform, real-time 3D interactive prototyping, preview, and rendering software. It can be used to create interactive visualizations and animation previews and produce lighting effects. Key Features: Lumion has a rich and easy to use user interface which has a traditional CADD feel. Real-time-rendering: Lumion supports real-time rendering of complex animations, making it ideal for creating live previews or presentations. It can be also used to create and render interactive and immersive demo suites. Editing: Lumion supports working with many 3D and 2D 3D models. Thanks to its powerful object manipulator, multiple objects can be moved, rotated, scaled, and combined into one material. Lumion's editable mesh features allow in-place editing of meshes, assigning materials and colors to them, and filling them with random noise to simulate noise particles. Scene / Mapping: Lumion supports a real-time mapping feature, using a simple navigation mesh to add objects or vertices, as well as a model-view hierarchy for a complete reworking of a model. Lighting: Lumion provides a real-time 3D viewport which can be used to preview and evaluate lights, reflecting surfaces, and shadows. Lumion allows you to map textures and materials to part of the scene. This means you can model a reflective surface with an array of different materials. This also allows lighting to be simulated in the scene itself. Importing: Lumion supports file import and export, using all common formats: Collada, DXF, IFC, OBJ, PLY, STL, VDR, and VRML. Export: Lumion exports to MP4, AVI, FLV and GIF format. Rendering: Lumion supports real-time rendering of animated graphics, using advanced rendering techniques, rendering rendering on a GPU, and previewing in a 3D viewport. Lumion can be also used to render photorealistic imagery using real-time rendering, and in post-production to create production animations, intermediate renderings and watermark animations.Q: How to convert String to Integer, Segmentation fault on C?
