General description of the game: The game is one life, 50 rounds, "2D-3D" In this game, you start out as a rookie police officer, who has to catch all of the criminals in the city. You start out in 3D Police Stations and while you can fight other criminals with your guns, you also have some tools that make the job a lot easier, such as search lights, and a radar. Visuals: The game is very nice and realistic, even though the graphics are the "2D-3D" way of making a game, it looks good. Character models look very good, but I could not see faces in some of them. Music: The music is very nice, some parts where good some parts where not, but it is very good overall. Sound: Some things are not great and others are, but most of the sound is good. Gun sounds are very good, and it sounds as if the gun has weight when you shoot it. Some sounds where there wasn't much in the game, but they are the ones where I would like to know more about the sounds. Action: Overall: 5/10 I enjoy the game, but it could have been a lot better. The Main Reroll system is very hard and there is not many ways to save it. I did not make this game! It was made by 3rd party.
